

Residential Mortgage Disclosure

For the First Quarter of 2022

RESIDENTIAL MORTGAGE FROM SHINHAN BANK CANADA

Shinhan Bank Canada Mortgage Loans are available to purchase residential properties, refinance, or renovate existing residential properties.

Typically, a minimum of 20% of the purchase price or appraisal value is required for the down payment. In other words, a maximum of 80% of the purchase price or appraisal value, whichever is lower, can be borrowed from Shinhan Bank Canada (the “Bank”). This particular type of mortgage is called a “Conventional Mortgage” and does not require mortgage insurance. Meanwhile, a “High Ratio Mortgage” refers to a mortgage in which the borrower has a down payment of less than 20% of the purchase value. A high ratio mortgage requires mortgage default insurance from CMHC or Genworth Canada, etc.

Currently, the Bank only provides Conventional Residential Mortgage Loans.

For the greater transparency, clarity and public confidence in the Bank’s residential mortgage portfolio, the Bank prepared the Residential Mortgage Disclosure for the first quarter of 2022.

1. Total amount and percentage of the residential mortgage loans and HELOCs that are insured and uninsured

(Unit: thousands of Canadian dollars)

	<i>Insured</i>		<i>Uninsured</i>		Total	
Residential Mortgage*	-	0%	489,359	100%	489,359	100%
Home Equity Line of Credit	-	0%	3,375	100%	3,375	100%

*Residential Mortgage includes all consumer loans secured by residential real estates.

2. A geographic breakdown for the amount and percentage of the total residential mortgage loans and HELOCs that are insured versus uninsured

(Unit: thousands of Canadian dollars)

Province	Residential Mortgage			Home Equity Line of Credit		
	Insured	Uninsured	Total	Insured	Uninsured	Total
Ontario	- 0%	429,153 100%	429,153	- 0%	3,065 100%	3,065
BC	- 0%	60,206 100%	60,206	- 0%	310 100%	310
Alberta	- 0%	- 0%	-	- 0%	- 0%	-
Total	- 0%	489,359 100%	489,359	- 0%	3,375 100%	3,375

3. The percentage of residential mortgages that fall within various amortization period ranges

Remaining Amortization as of March 31st, 2022

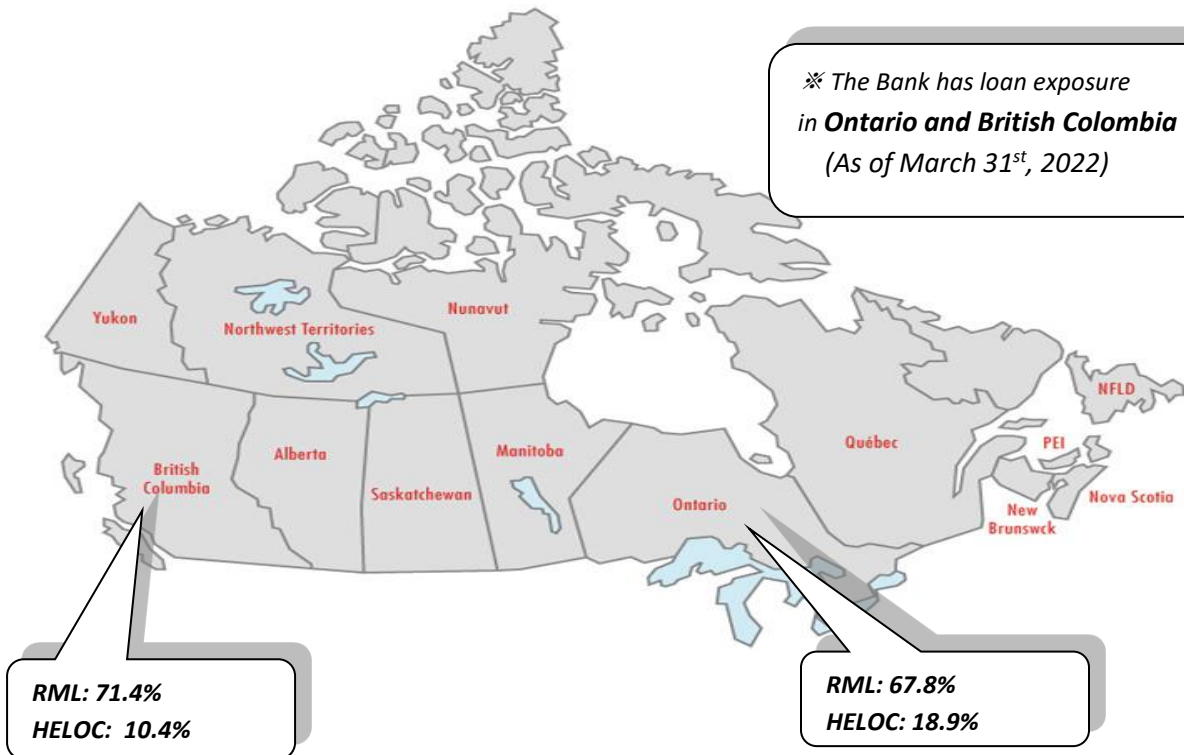

Amortization Period	1 -20 Years	21 -25 Years	26 -30 Years	More than 30 Years	Total
Canada	3.0%	12.5%	84.6%	0%	100%
Other Jurisdictions	-	-	-	-	-

4. Average Loan-to-Value (LTV) ratio for the newly originated Residential Mortgage Loans and HELOCs (1st Quarter of 2022)

(Units: thousands of Canadian dollars)

Loan Type	Residential Mortgage			Home Equity Line of Credit
	Conforming	Non-conforming	Total	
Amount	59,323	0	59,323	487
Average LTV	68.52%	0%	68.52%	HELOC Only: 15.38% Combined: 65.50%

5. A Geographical Breakdown of the Average LTV ratio for the newly originated Residential Mortgage Loans and HELOCs (1st Quarter of 2022)

6. Average GDS and TDS for the newly originated Residential Mortgage Loans and HELOCs (1st Quarter of 2022)

	GDS (%)	TDS (%)
Average	29.85	39.64

* Balance-weighted avg; Non-income qualifying loans are not included.

GDS (Gross Debt Service Ratio): It is the percentage of gross income required to cover principal, interest and property tax payments. It is calculated by dividing the total annual payments of principal, interest and taxes by the defined gross annual income.

$$\text{GDS} = (\text{Principal} + \text{Interest} + \text{Property Taxes} + \text{Utility Costs}) / \text{Gross Income}$$

TDS (Total Debt Service Ratio): It is the percentage of defined income necessary to cover principal, interest and property tax payments, maintenance fees (if applicable) plus all other payments. It is calculated by taking the total principal, interest and tax payments used in the GDS calculation, adding all annual payments required for installment accounts and dividing by the total gross income.

$$\text{TDS} = (\text{Principal} + \text{Interest} + \text{Property Taxes} + \text{Utility Cost} + \text{All other annual debt payments}) / \text{Gross Income}$$

▪ THE POTENTIAL IMPACT ON RESIDENTIAL MORTGAGE LOANS AND HELOCs IN THE EVENT OF AN ECONOMIC DOWNTURN

Stress tests conducted on the Bank's assets revealed that the Bank's residential mortgage and HELOC portfolio would be able to survive the impact of a severe economic downturn.

	From 1989 to 1996
Maximum Drawdown in GTA house price	-28%

We used the early 1990's real estate market downturn as a benchmark of our annual Stress Test. The test, based on our loan portfolio as of December 31, 2021, was performed on three hypothetical scenarios of real estate market decline. Due to the Bank's conservative Loan to Value coverage and stringent mortgage practice, the impact from the residential property value decline was manageable. The bank's loss on residential real estate, in the worst case scenario, is estimated to be approximately C\$2,569K. The BIS ratio (combined residential and commercial real estate) in the worst case scenario is 16.83%, which is well over the minimum OSFI requirement of 10.5% and the Bank's internal limit of 14.5%.

In conclusion, severe decrease in property values can be absorbed by the current mortgage portfolio. In the event of a severe economic downturn, the Bank will operate in a more conservative manner in granting the Residential Mortgage Loans and HELOCs.
